Kevin Chang

Senior Data Scientist | Banking Pricing, AI & Customer Intelligence

Auckland, New Zealand kevin.ct.chang@gmail.com linkedin.com/in/kevin-ct-chang github.com/kcha193

Statistical depth. Commercial context. Clear decisions. Senior Data Scientist at ASB Bank specialising in banking pricing and customer intelligence. My background spans model assurance, government policy microsimulation and statistical consulting. I connect analytical methods with the decision at hand: the commercial trade-offs, customer outcomes, assumptions and risks. Public research and open-source software show how I make statistical work usable and reproducible.

Banking pricing | **AI / ML** | **Customer intelligence** | **Model risk** | **Executive insight**

PROFESSIONAL EXPERIENCE

Senior Data Scientist — ASB Bank, Auckland, New Zealand

Jan 2026 – Present

- Develop pricing models and analytical frameworks to support product and commercial decisions.
- Assess product performance across revenue, profitability and customer outcomes.
- Evaluate pricing performance and communicate recommendations and limitations to senior stakeholders.
- Bring model-risk and conduct-risk considerations into pricing analysis.

Data Scientist — ASB Bank, Auckland, New Zealand

Jan 2023 – Jan 2026

- Developed predictive models for customer lifetime value, segmentation, churn and product recommendation to support planning.
- Applied language models to open-ended survey responses to explore themes and customer sentiment.
- Worked with product, design and engineering colleagues on analytical tools and data products.

Model Assurance Specialist — ASB Bank, Auckland, New Zealand

Jan 2021 – Jan 2023

- Validated models by assessing methodology, data quality, implementation and performance monitoring.
- Challenged assumptions through statistical analysis and documented model limitations.
- Worked with model developers, risk colleagues and senior stakeholders to communicate validation findings.

Modelling Analyst — The New Zealand Treasury, Wellington, New Zealand

Jan 2019 – Jan 2021

- Built and maintained microsimulation models to analyse tax and welfare policy scenarios.
- Combined survey and administrative data for policy analysis.
- Developed R Shiny dashboards and R packages to make analytical outputs accessible to policy teams.
- Worked with policy colleagues and government agencies to clarify analytical questions and communicate findings.

Statistical Consultant — Statistical Consulting Centre, University of Auckland, Auckland, New Zealand

Jan 2014 – Jan 2019

- Provided statistical consulting across academic, government and commercial projects.
- Developed web-based analytical tools and R packages for research and applied analysis.
- Worked on experimental design, survey methods, longitudinal modelling and causal inference.
- Delivered R programming workshops and training for researchers and practitioners.

SELECTED PROJECTS

Automated Psychometrics

Collaborative research

A documented open-source tool and peer-reviewed methods paper, with methods and source code available for inspection.

R · Shiny · Rasch Analysis · Psychometrics

CORE SKILLS

AI / ML / GenAI

Machine learning, Predictive analytics, Generative AI / LLMs, LLM survey & sentiment analysis, Churn prediction, Customer segmentation, Product recommendation

Data Engineering / Analytics Platforms

SQL, Snowflake, Databricks, dbt, Shiny dashboards, Data products, Git

Communication / Stakeholder Impact

Executive insight translation, Stakeholder communication, Mentoring, Research, Consulting

Pricing / Banking / Optimisation

Pricing strategy, Revenue optimisation, Customer lifetime value, Customer intelligence, Model assurance & validation, Regulatory model risk

Programming / Modelling

R, Python, Advanced statistical modelling, Microsimulation, Experimental design, Data visualisation
